How to Fold a No-Flake Firing Box

Caution!

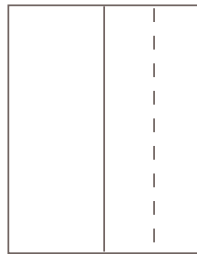

Foil is very very sharp! Wear gloves and long sleeves to protect from cuts.

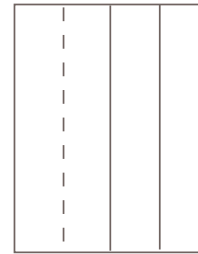

7" x 9" sheet

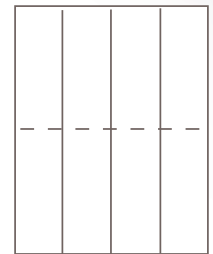

Fold in half the long way

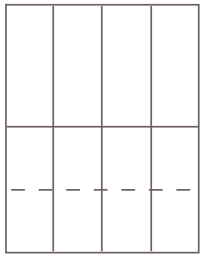

Open, fold up to first fold

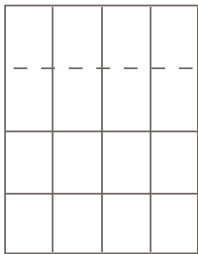

Repeat on other end, then open

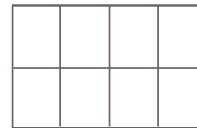

Fold in half the short way

Open, then fold to half way mark

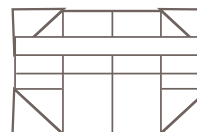

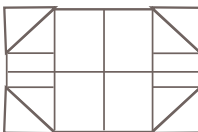

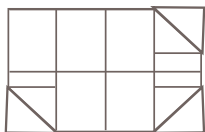

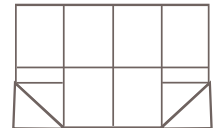

Open, repeat on the other end

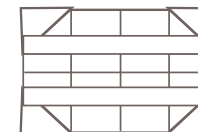

Fold the 2 ends again so they meet in the middle

Fold up each of the corners

Fold the flap back

Fold the other flap back

Burnish well after every fold. After all folds are made, open the box from the center, then adjust and square up the sides. Be sure to visit us online to view our video showing this process from beginning to end. Test fire to determine your optimum firing schedule for the clay at hand.

Sheet Size	Box Size	Lid
9" x 12"	6" x 5" x 2-1/2"	Start with a sheet 1/4" larger in length and width and fold exactly the same as for the box.
8-1/2" x 10"	4-1/4" x 5" x 2"	
7" x 9"	3-1/2" x 4-1/2" x 1-3/4"
